

The NeIC 2022 Joint Statement

Tuesday, 31 May 2022 09:55 (15 minutes)

Digitalisation and the green shift are at the top of the EU's research and innovation policy agenda, paralleling the Nordic Council of Ministers' new vision for the Nordic region to become the world's most sustainable and integrated region by 2030. The Programme Committee of NeIC2022 finds open science and data sharing to be a pillar in the concrete work to be undertaken in moving the hotbed of research and innovation towards the Nordic region. To nurture this work, the Programme Committee has developed a vision statement for enhanced Nordic collaboration within open science data. The vision has been circulated to six national ministries of research (or equivalent) for comments and adjustments.
