

Why should organizations have an RSE / RSE group?

This submission aims at providing a space for the community to discuss topics and questions around suggesting the idea of an RSE/ RSE group to employers. Depending on the audience, we will utilize in-person or remote collaboration tools for the discussion and split into smaller groups if necessary.

The outcome of the discussion would be a blogpost for the Nordic-RSE website with suggestions on how RSE enthusiastic academics, specialists, developers and the like could start a conversation with their organizations about offering RSE positions or even starting an RSE group.
