CPU Usage Comments

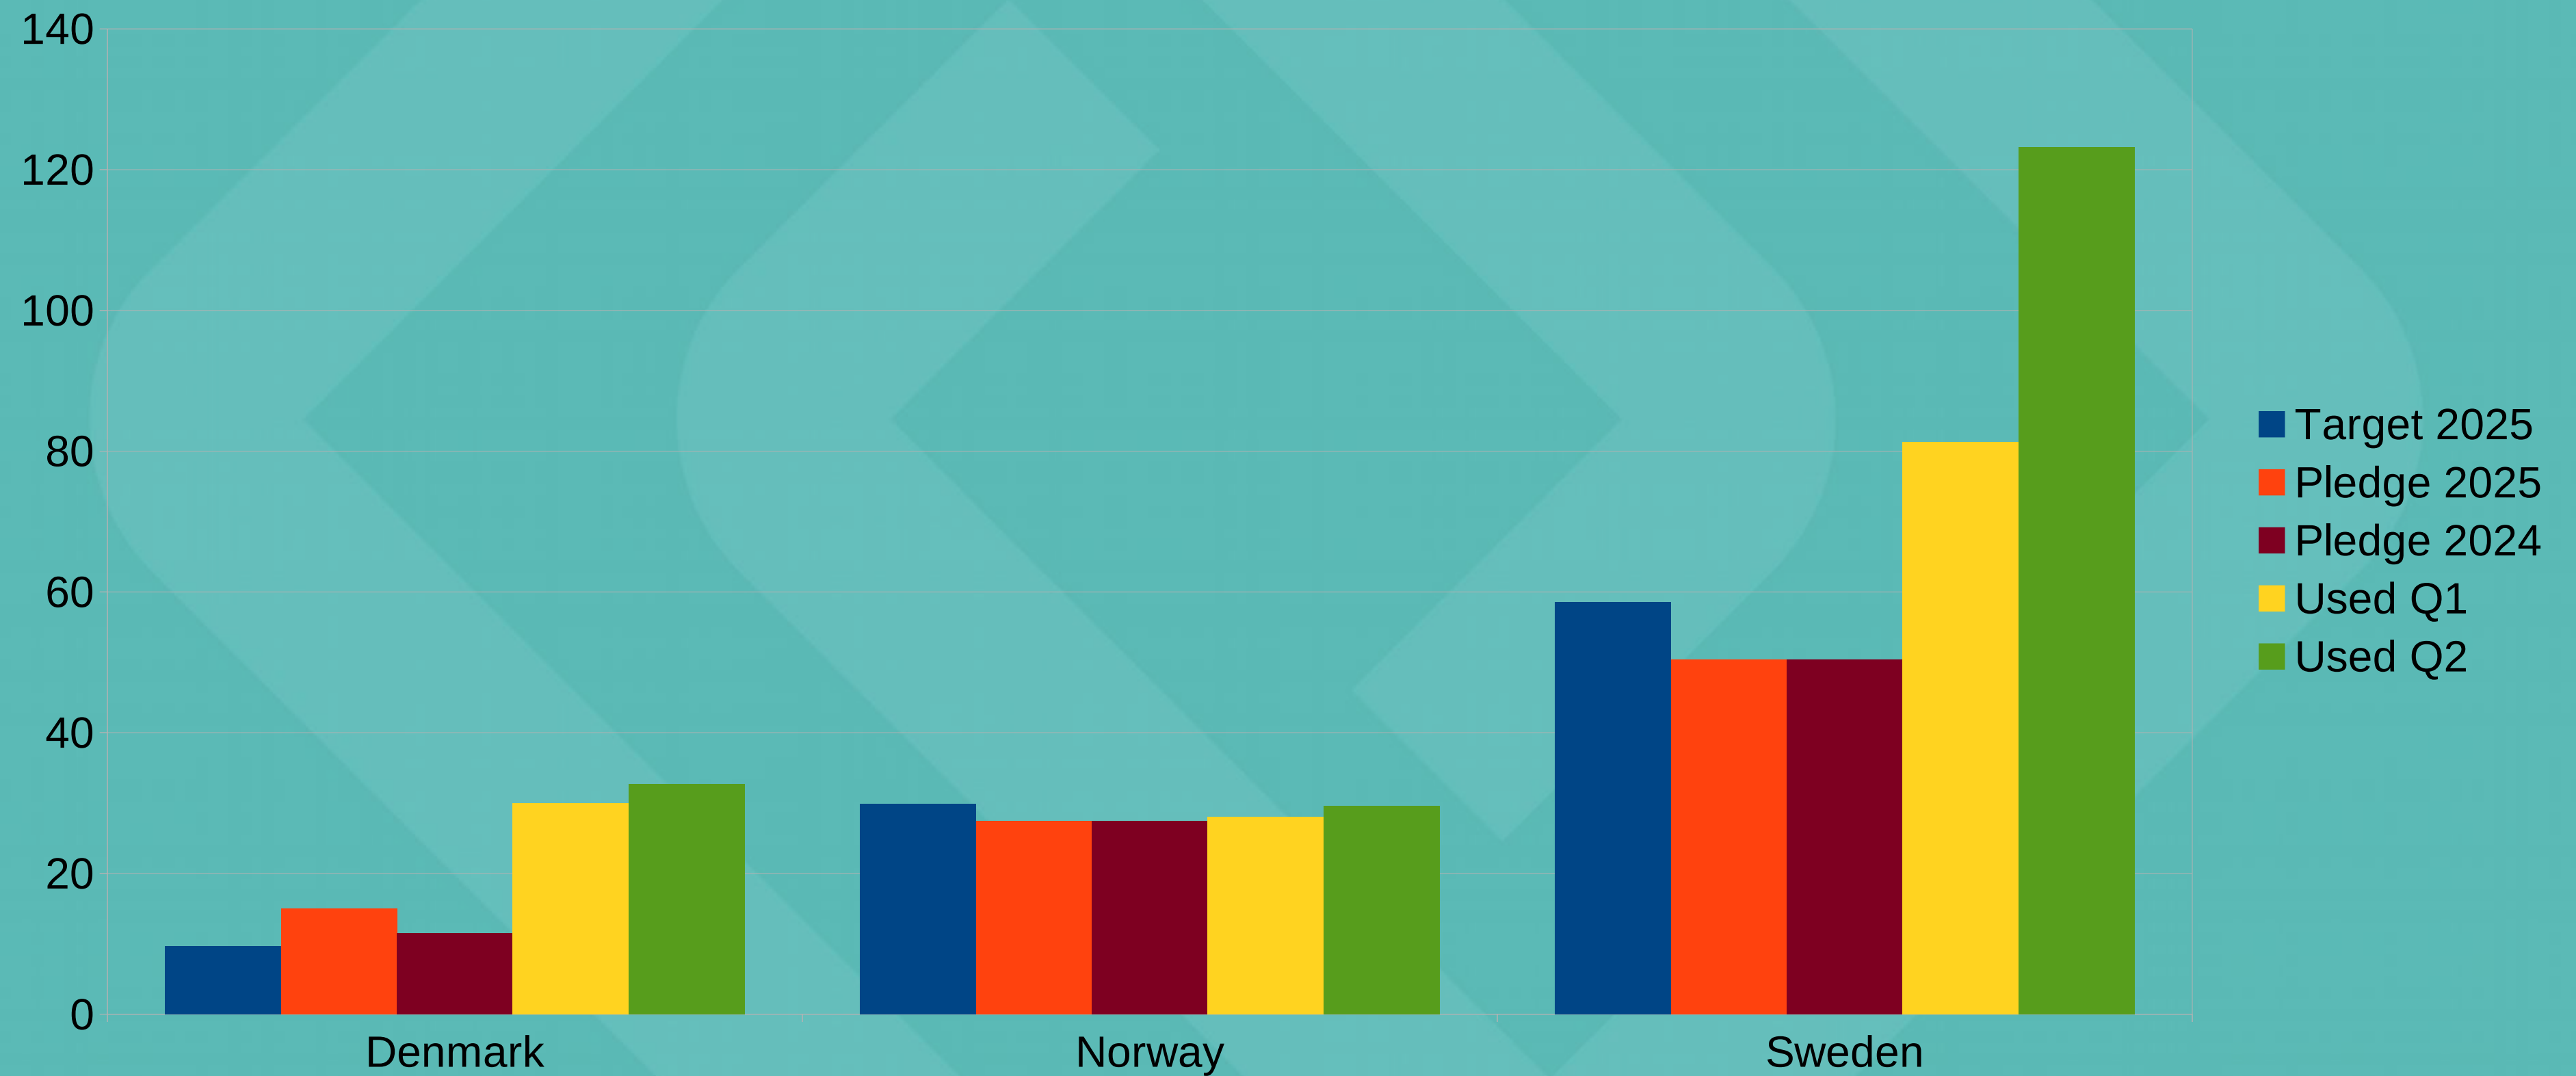

- ALICE filling clusters better, but still the occasional job drought
 - Sweden has some kind of compatibility issue that breaks jobs, but neither NSC nor ALICE has figured out why – and this quarter it was really bad
- HPC2N's new cluster Aigert still with staging issues
 - Has improved since around March with some OS and ARC upgrades
 - Should still be possible to get another 25% out of the hardware
 - In Q2 it delivered the full Nordic combined pledge, so not urgent
 - Discussion with ARC developers regarding performance
