2025-11-20
NLCG Committee meeting 4/2025
Kastrup, Denmark

Noteworthy Events

- We have started migration of ALICE tape data from HPC2N and NBI to UiB
 - HPC2N now takes 2025 data
 - NBI will shortly be ready, cleanup took longer
- New headnodes in production
- One old UiO pool broke
 - It's been a few rough weeks trying to rescue the data on it

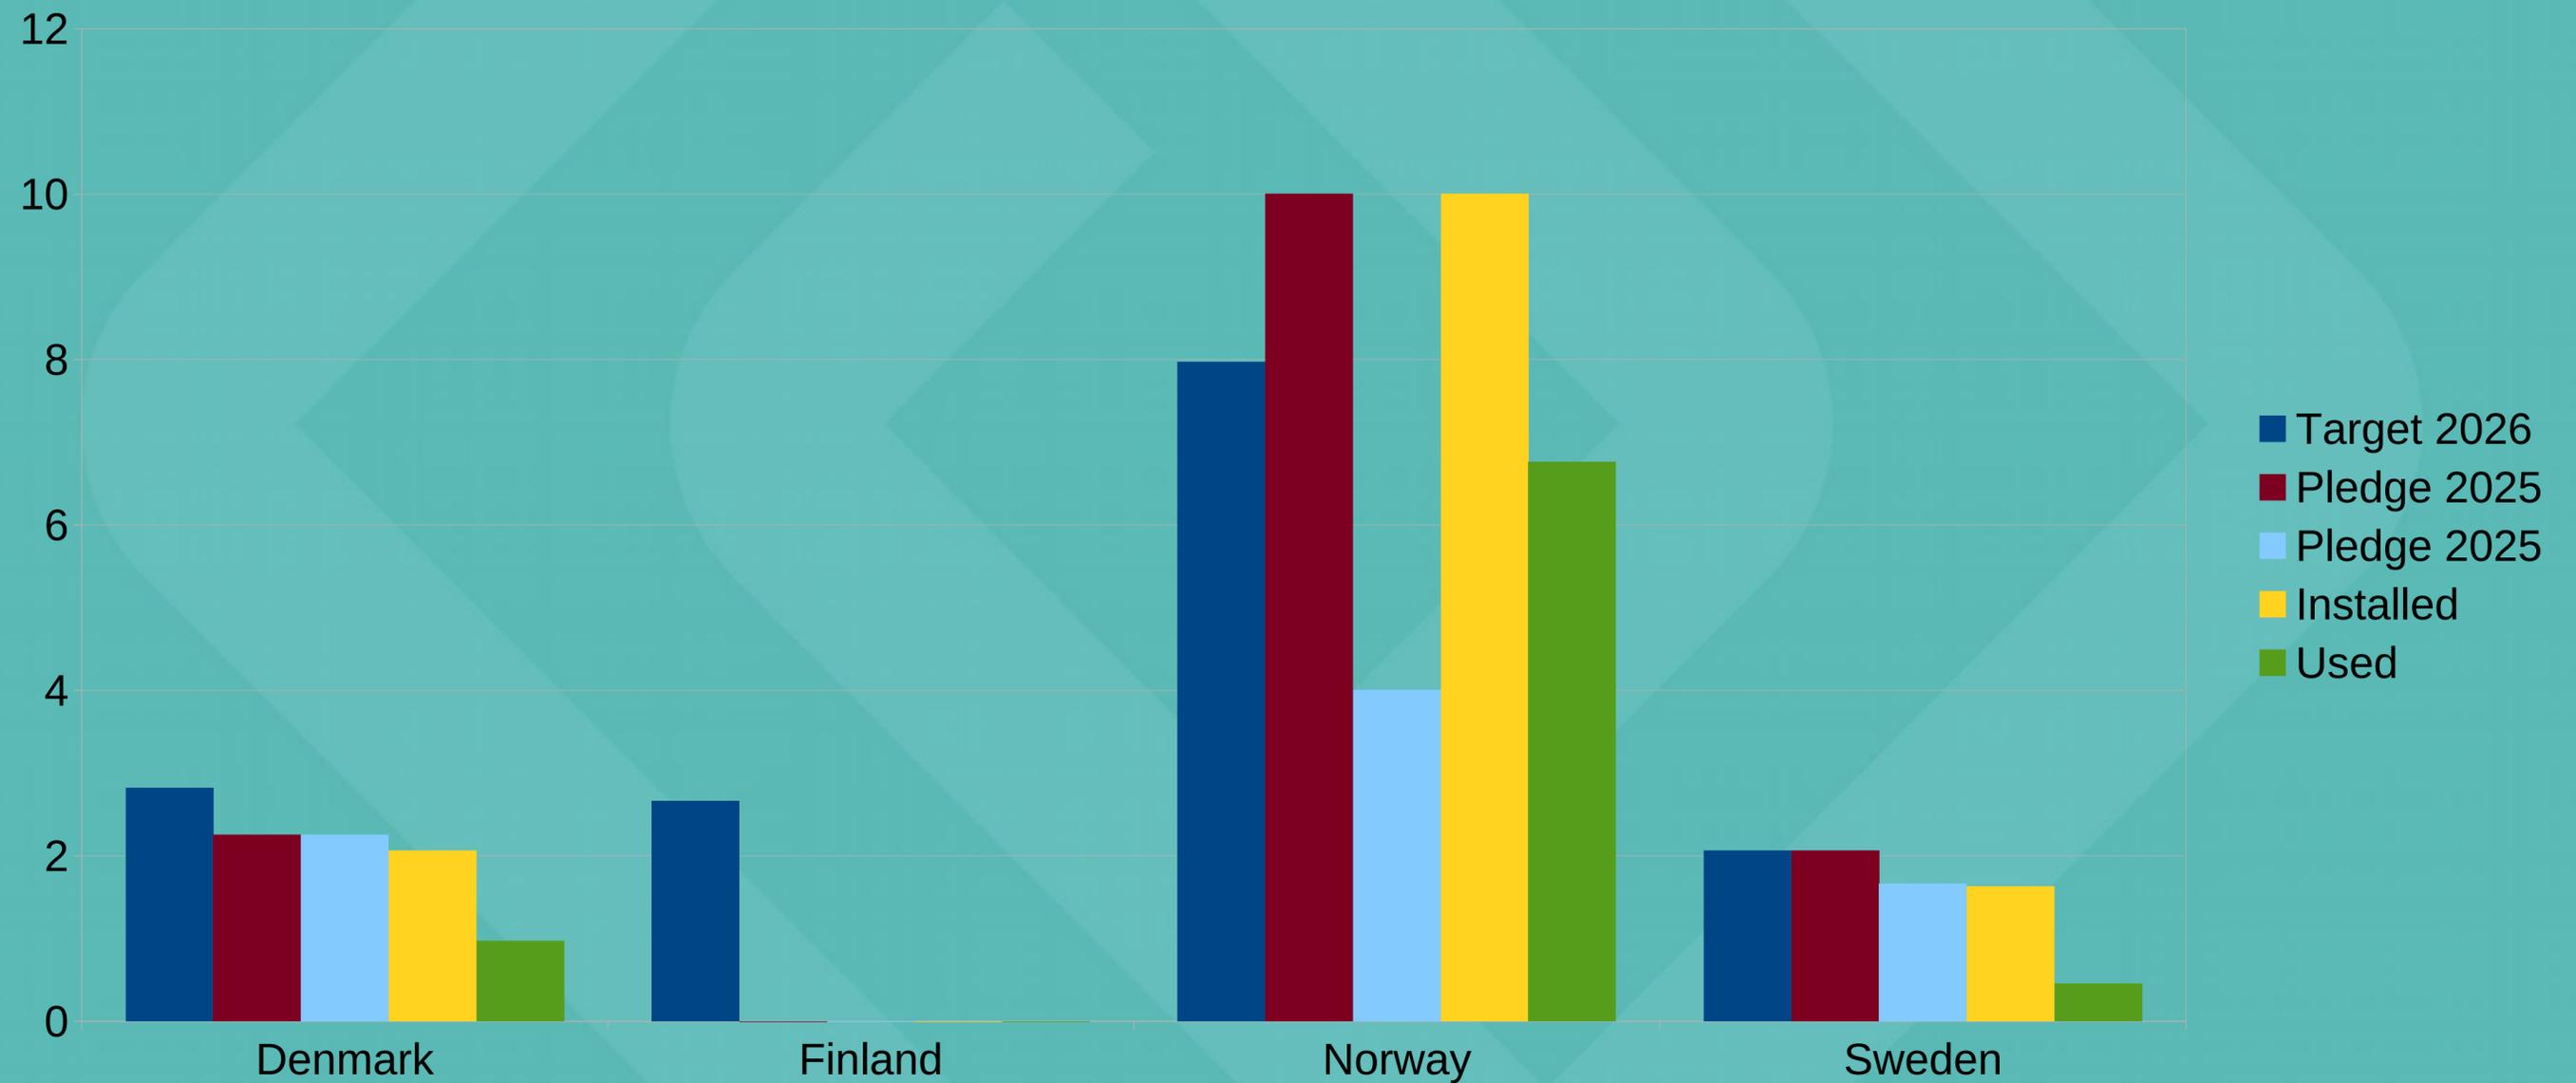

Resource changes

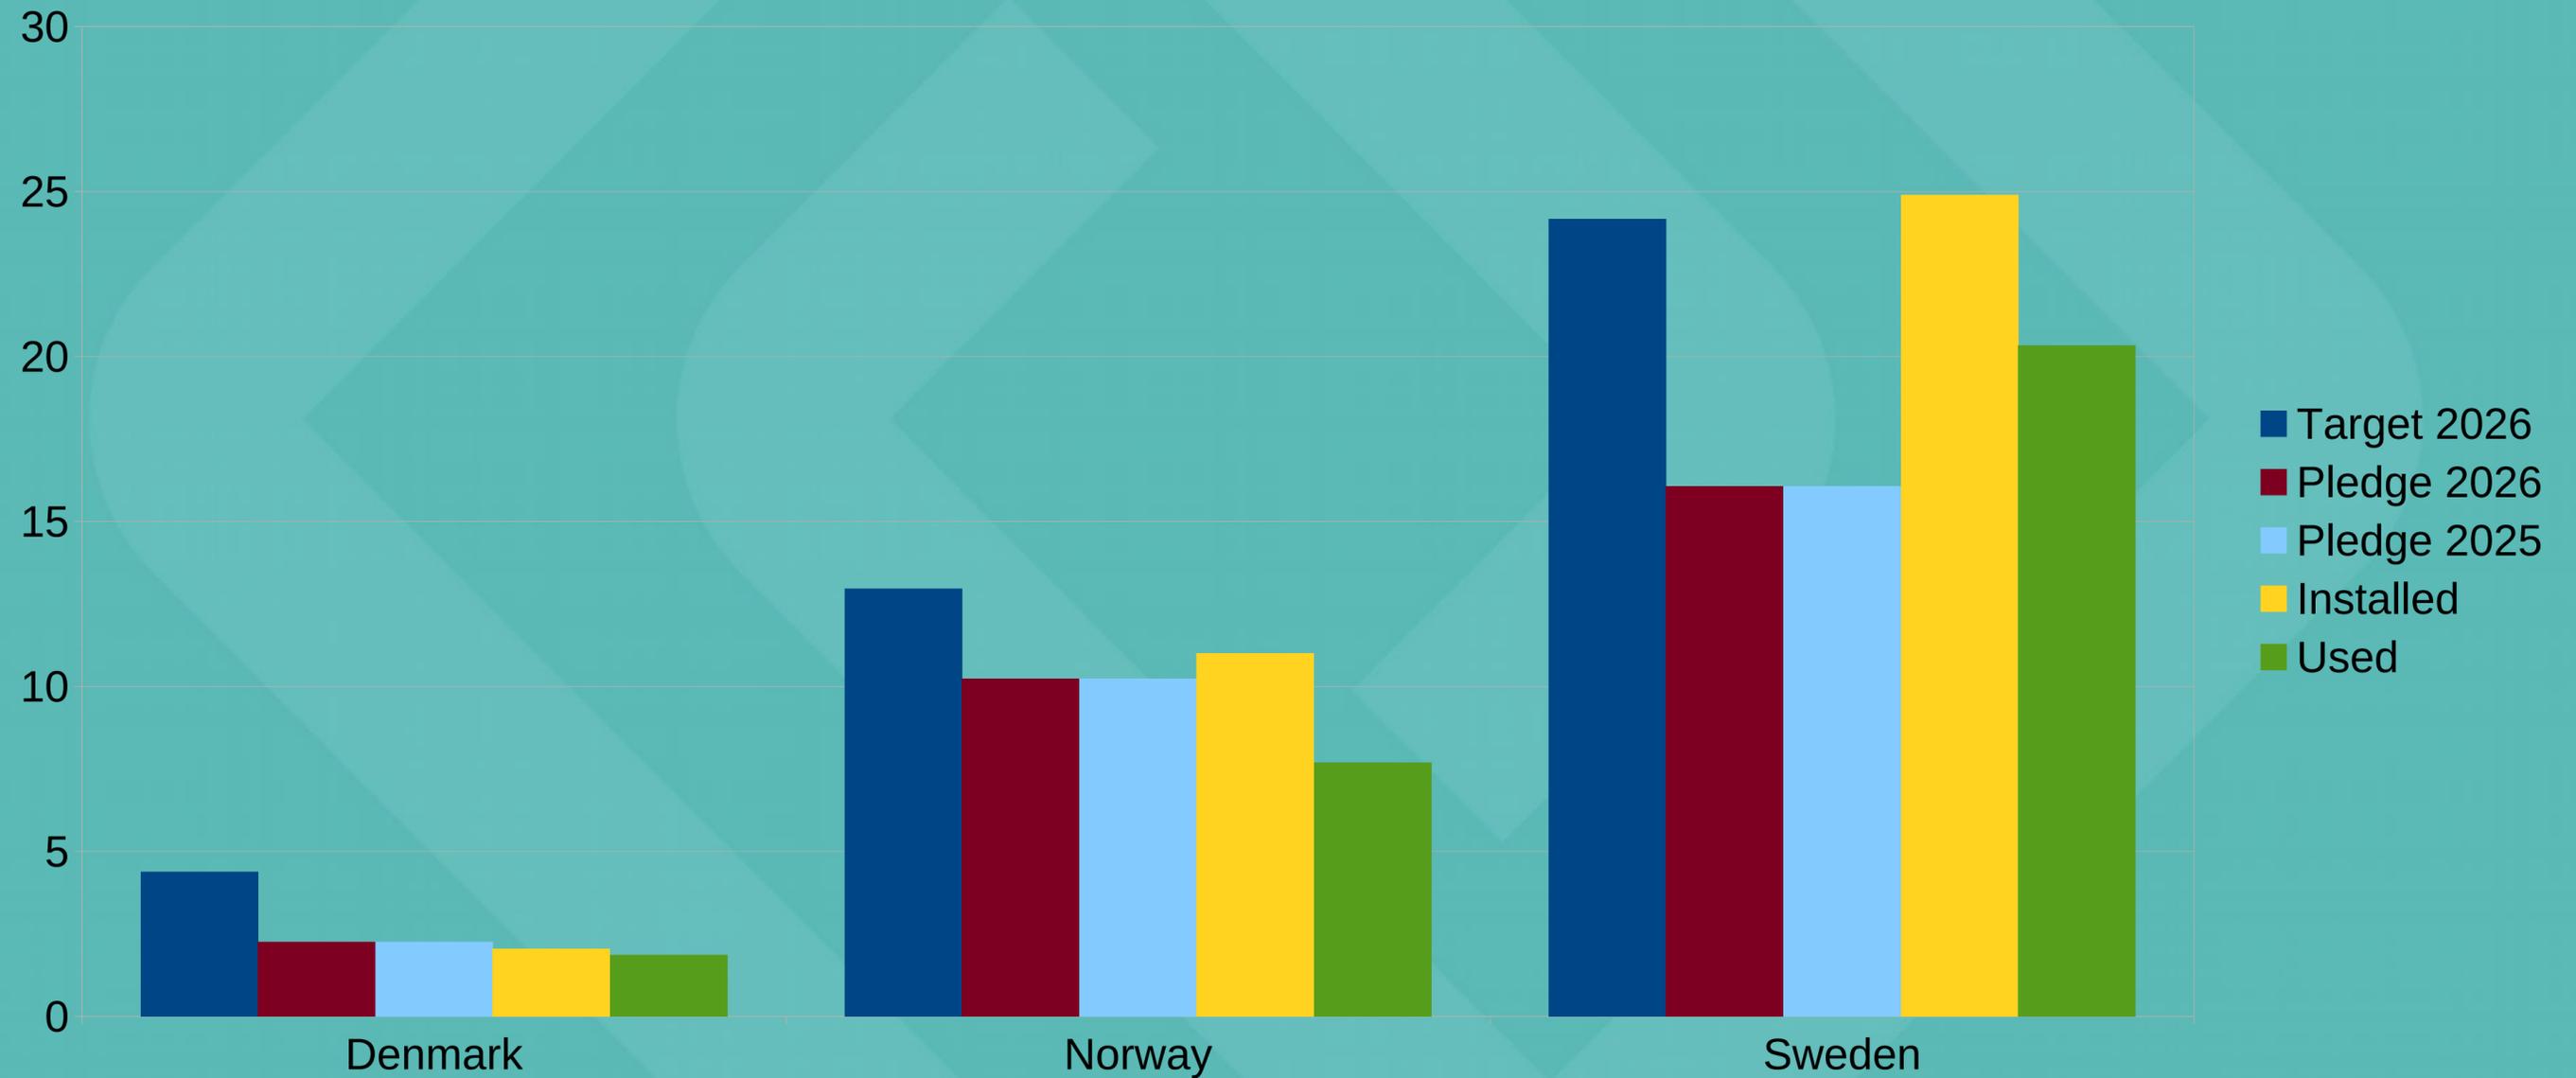

- Replacement disk at HPC2N and NSC installed
 - Slightly bigger than the old to handle upcoming pledges
- Old UiO disk decommissioned
 - Took up the space increase above
 - New UiO disk pending performance engineering
- Got notice that the current NBI disk should be evacuated due to being old and out of service
 - But no new disk planned for purchase due to funding?

ATLAS Disk

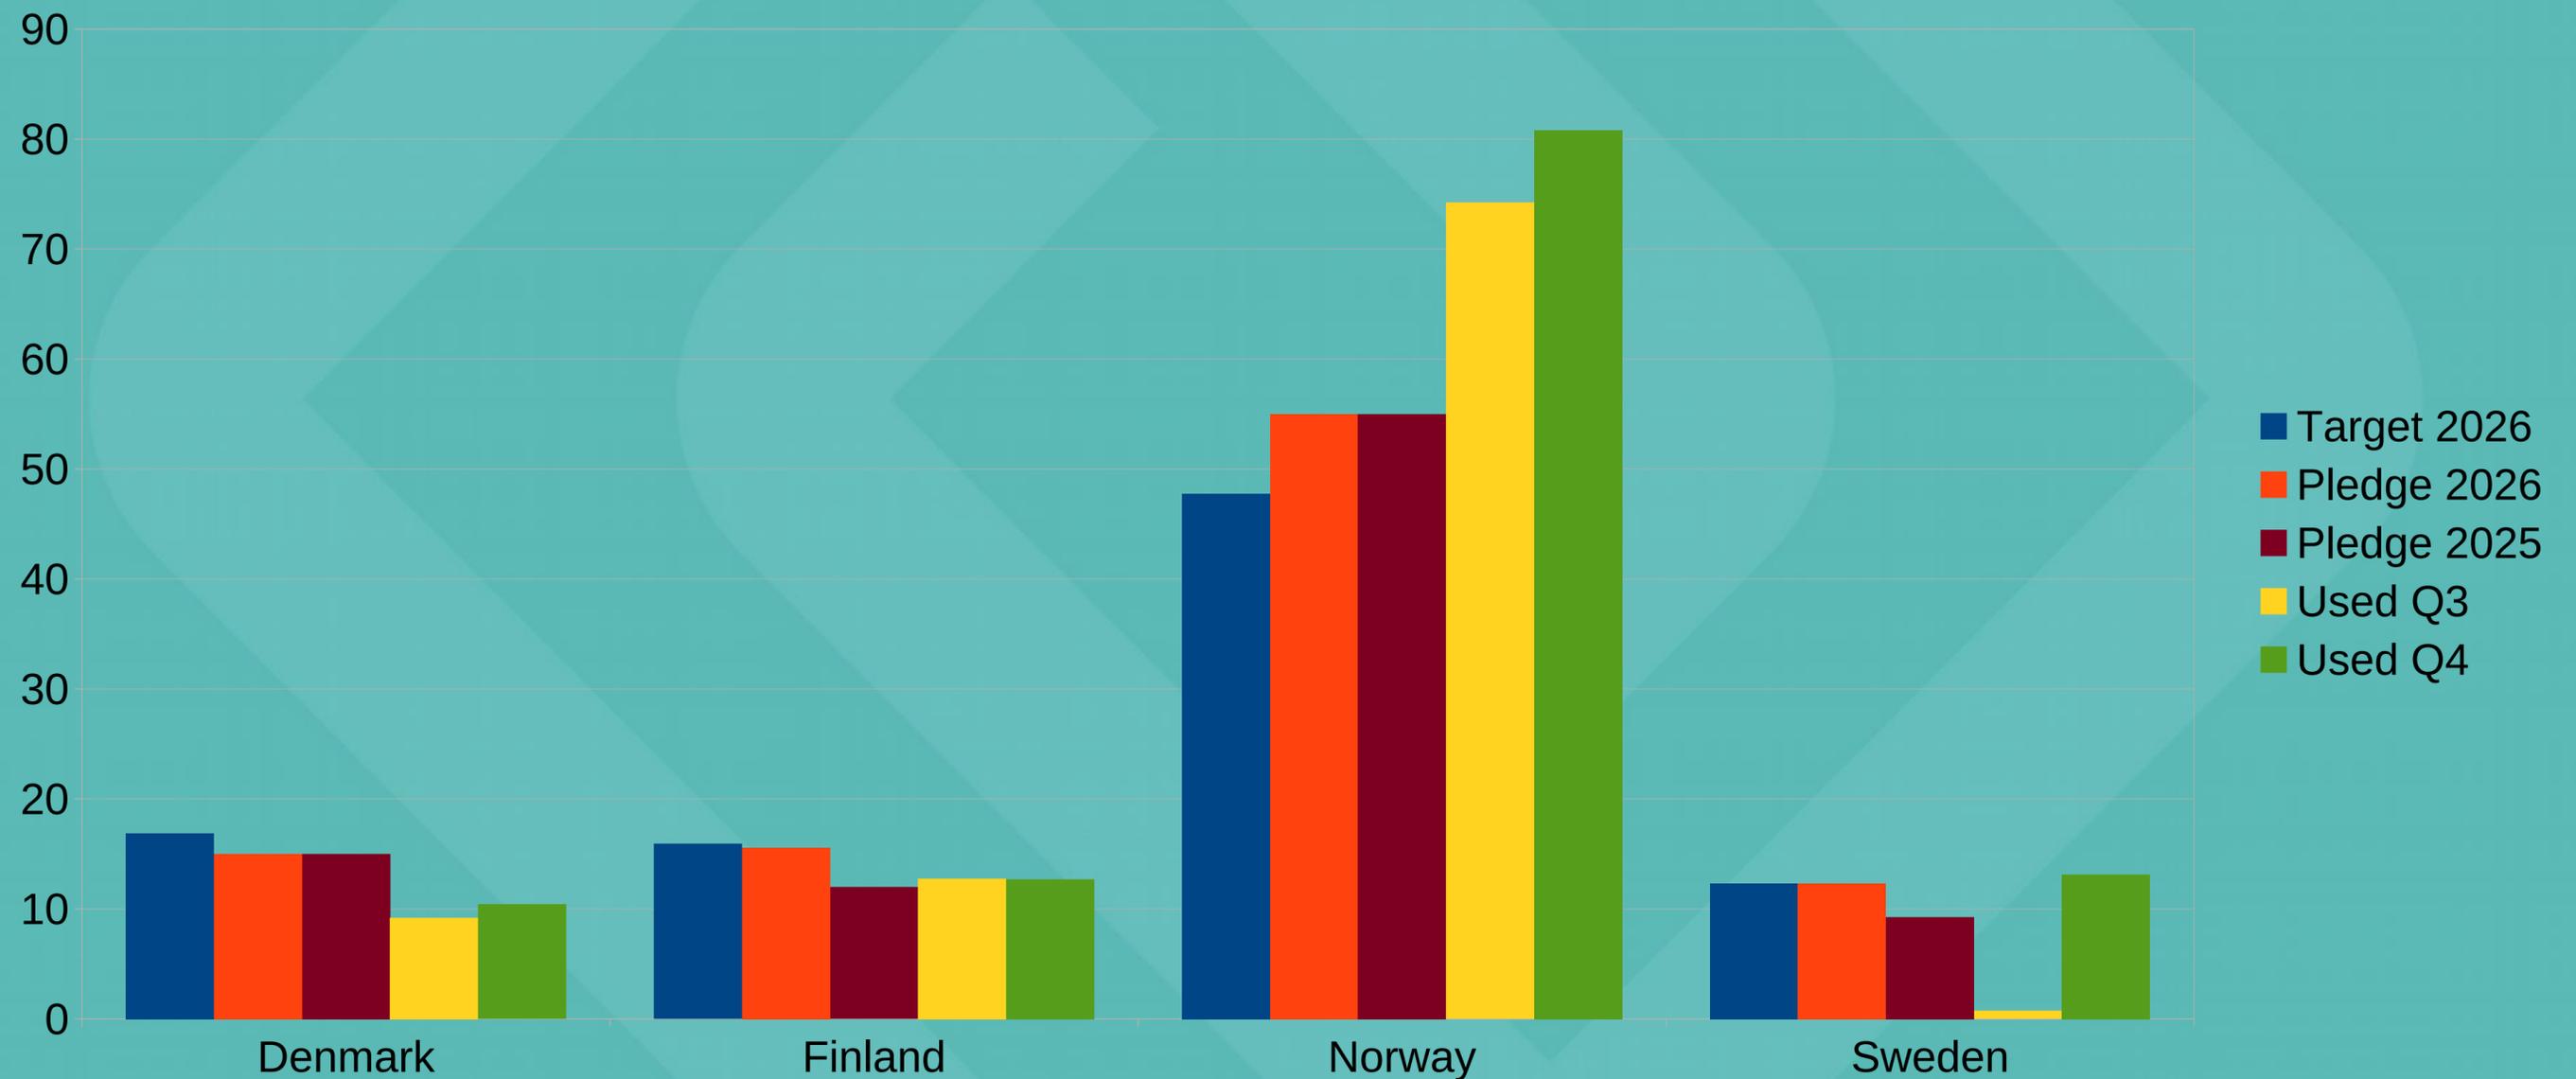

CPU Usage Comments

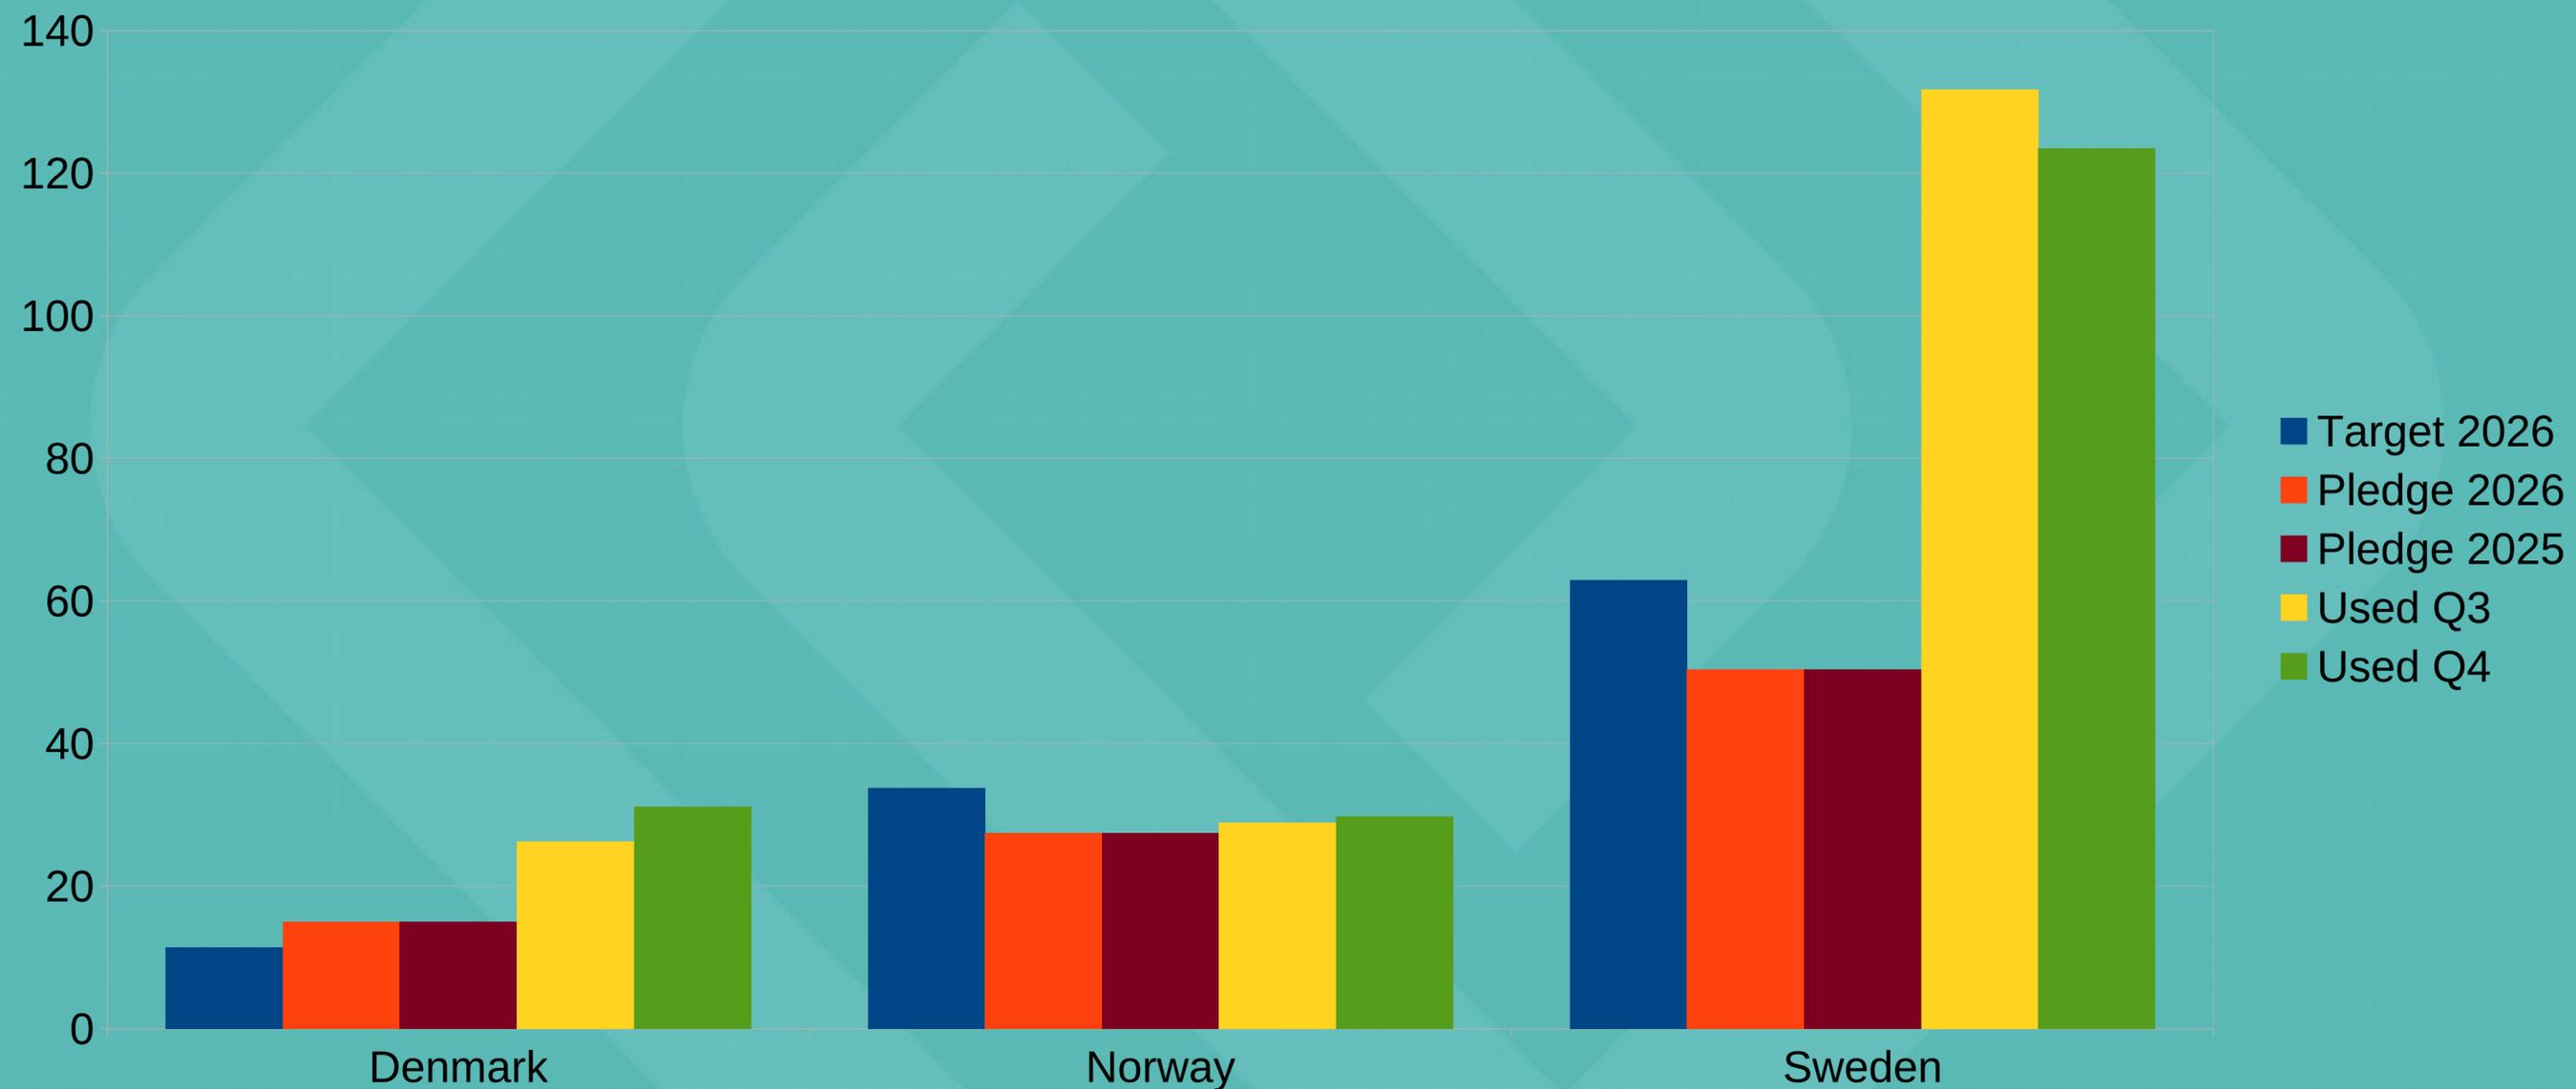

- ALICE computing at NSC fixed in mid Q4
- Small shortfalls in computing not affecting total Nordic delivery due to:
 - Big ALICE compute in Bergen delivering roughly total Nordic pledge
 - Big ATLAS compute in Umeå delivering roughly total Nordic pledge (will look different in Q1 due to Umeå compute having issues)

ALICE CPU

ATLAS CPU
