

# Together the Nordic countries are tackling e-infrastructure challenges beyond singular national capabilities

NORDIC E-INFRASTRUCTURE COLLABORATION

Since 2012 as part of  NordForsk  
Open NeIC strategy process for 2020-2025

Future: **Societal impact, sustainability, realisation of benefits**  
Professional project steering methods (Tieto PPS)  
Transition towards annual open calls for collaboration projects

**NeIC Funding**  
2017: 55 MNOK  
2018: ~73 MNOK

## Funding model

- joint funding proposals with national e-infra providers, 10-year MoU
- not just 50% co-funding ('finding sweet spot of collaboration')
- joint EOSC-Nordic proposal

Some projects and their partners:

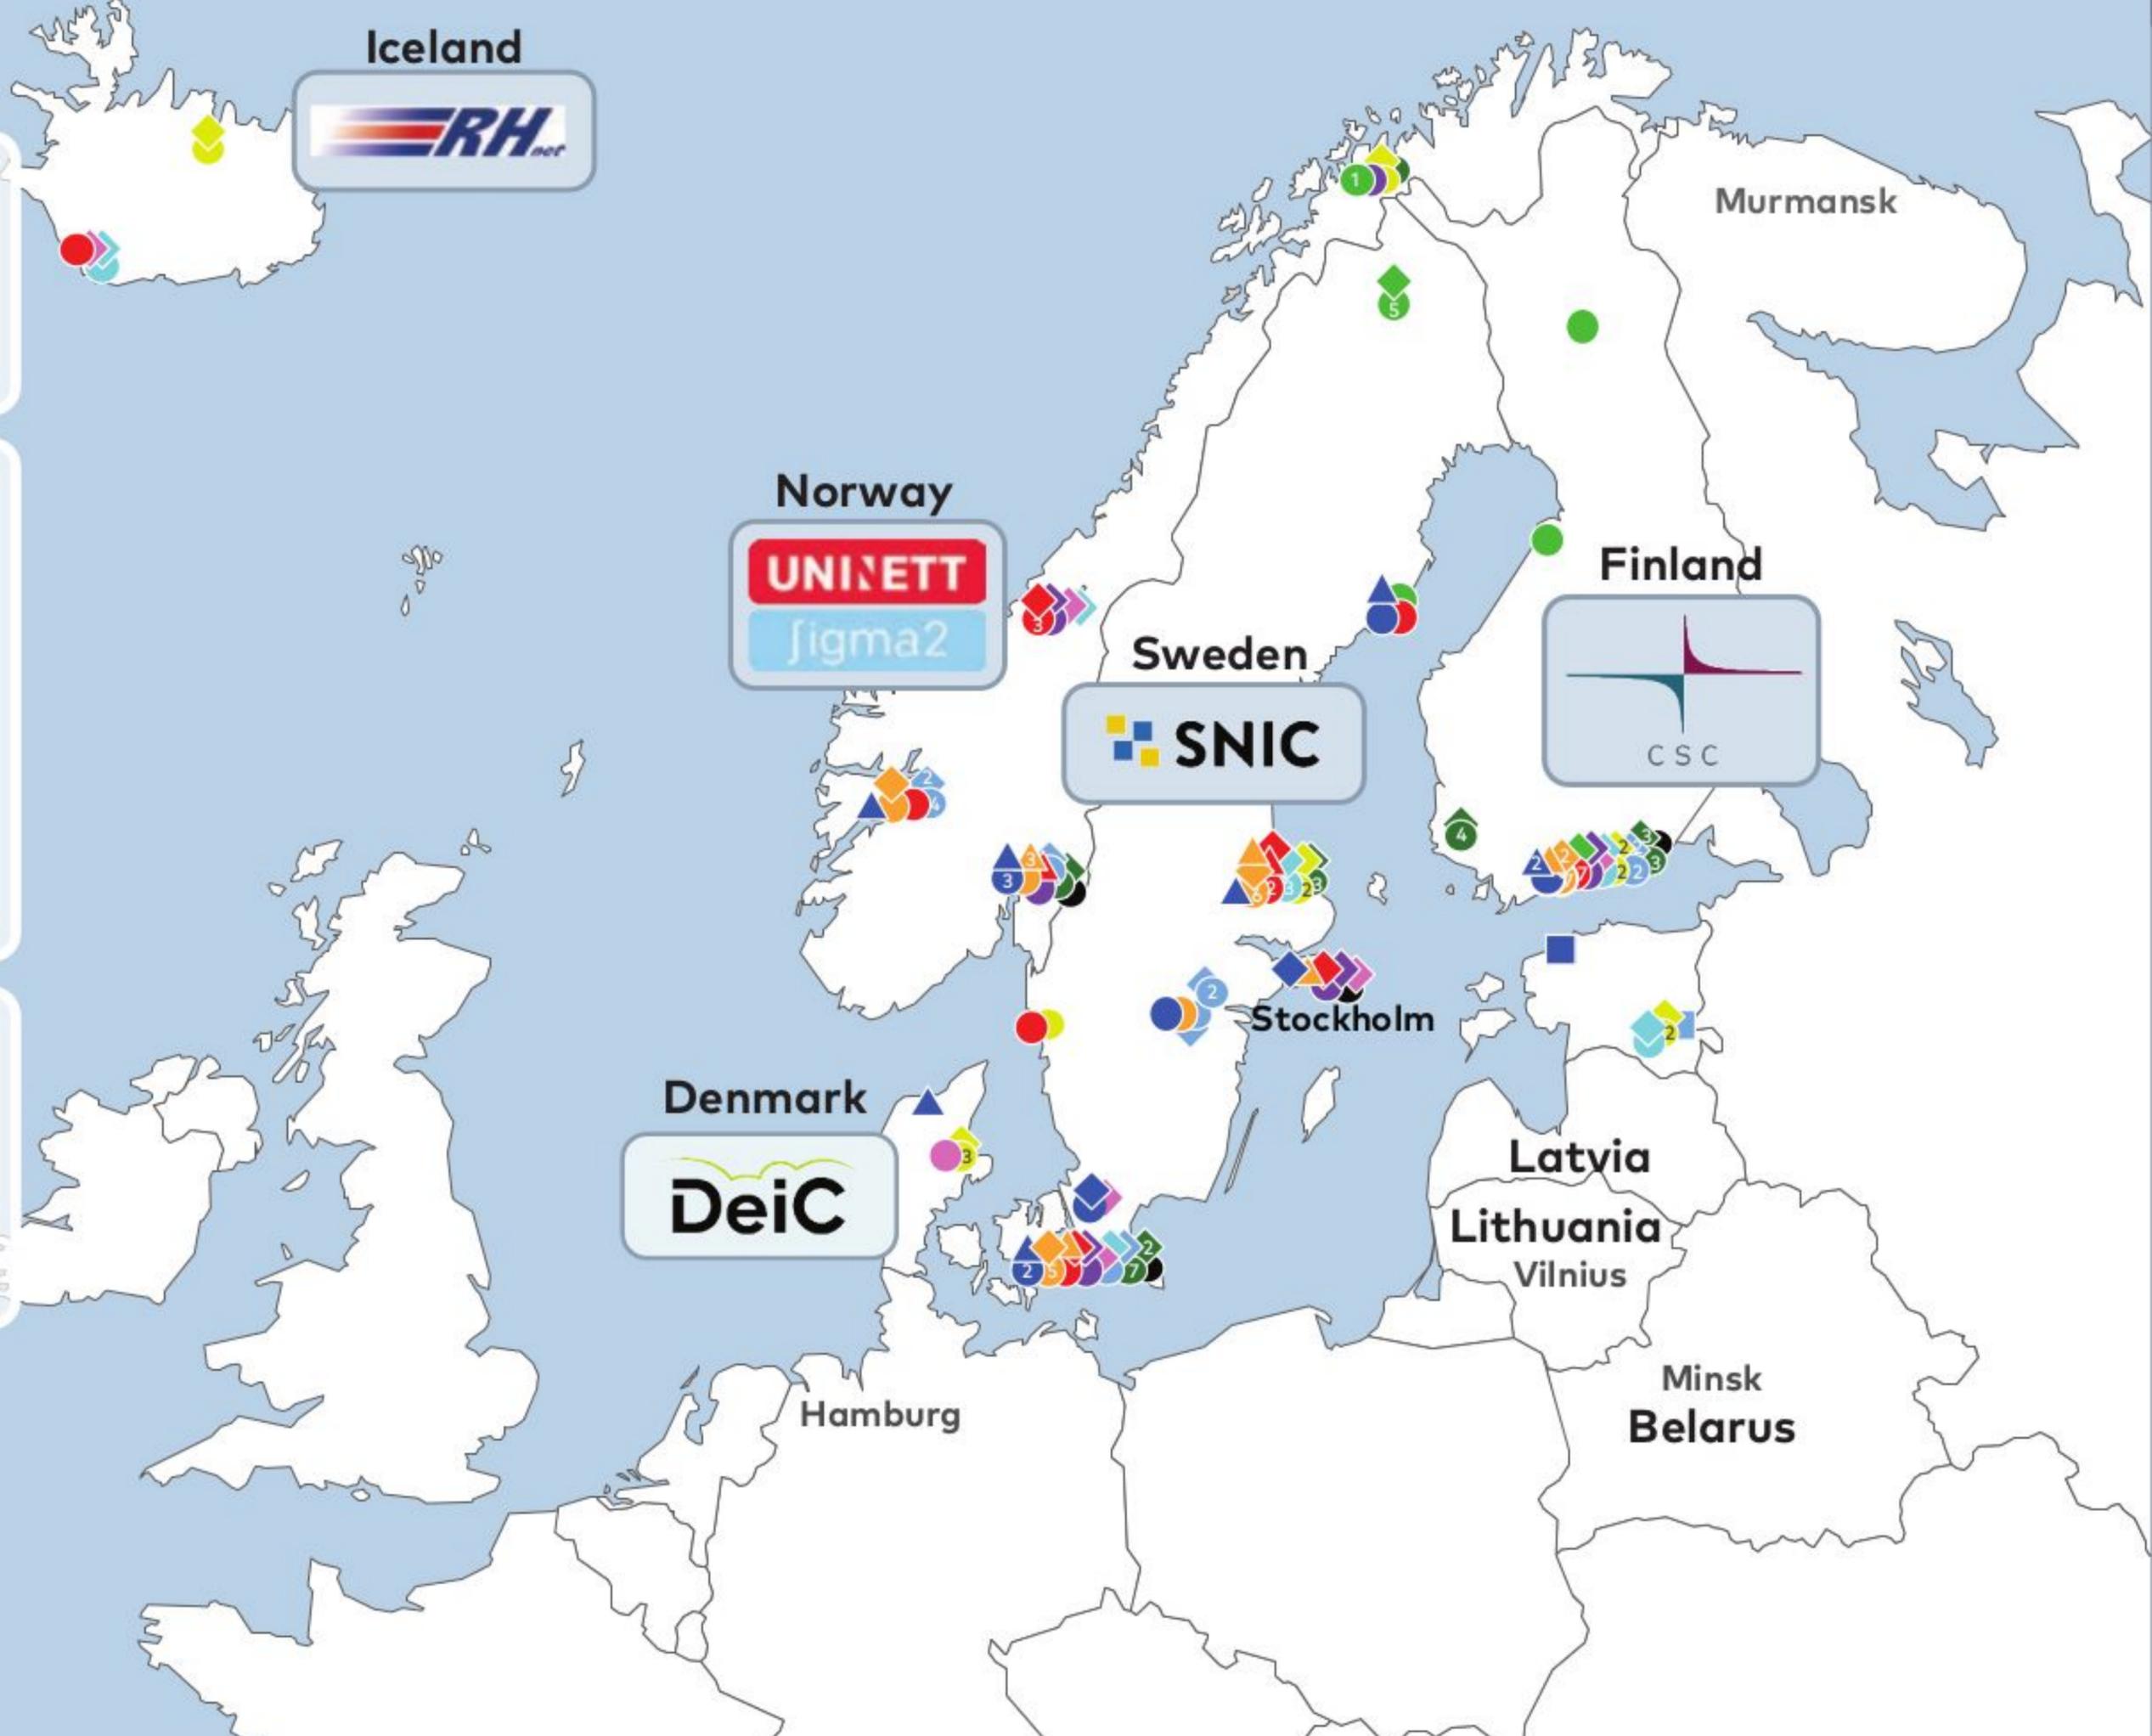

<b>Nordic Tier-1 (aka NDGF)</b>			
<b>Tryggve (2)</b>			
<b>CodeRefinery (2)</b>			
<b>Glenna (2), iOBS</b>			
<b>DeepDive</b>			
<b>EISCAT 3D (Data) Support</b>

# NeIC 2019 - Nordic Infrastructure for Open Science

14-16 May 2019  
Tivoli Hotel & Congress Center  
Europe/Copenhagen timezone

## Overview

- Timetable
- Programme details
- Call for Abstracts
- Book of Abstracts
- Social Activities
- Practical Information
- Registration
- Participation list

The NeIC conferences are organised biannually bringing together around 230 experts, researchers, policy makers, funders and national eInfrastructure providers from the Nordics and beyond. The aim is to create an opportunity for people in the eInfrastructure field to connect and collaborate with colleagues across the Nordics and to enable them to share knowledge and expertise. The title for this year's event is 'Nordic Infrastructure for Open Science'. We will take a closer look at how we can collaborate across borders to strengthen the field of Open Science. During the three days of the conference we will show examples of Open Science collaborations taking place in the Nordic region, as well as connect what is happening in the Nordics to a larger, international context – in particular the [European Open Science Cloud](#).

NeIC2019 is a collaboration between [CSC](#), [DeiC](#), [NeIC](#), [RHnet](#), [SNIC](#), and [UNINETT Sigma2](#).
