UCPH site report

- Disk

We currently have:

2x 5 pools of 97T

1x 2 pools of 118T

Puts us short by 0.5P – is work in progress

UCPH site report

- TAPE

1000 LTO6 tapes online – should put us short by just 24 tapes to meet pledge

Have 2 tape servers to install – and the 2 current needs a reinstall afterwards (got extra disks for R/W pools)

UCPH site report

Compute

- We are below pledge – but will do a tender, after Rome launch
- CentOS 7 is work in progress – first cluster with CentOS7 is up and running
- IPv6 somewhere on TODO

UCPH site report

- Network

The !OPN network is 100G – routed by KU-it and we should have dual path

The OPN needs some work/coordination by NorduNet/DeiC/KU-it before it can switch to 100G

UCPH site report

- Site

After the power was fixed and remote cooling installed, our heat exchangers has now been replaced to actually match the remote cooling – but the plumbers still needed supervision, in order to install it correct ..
